Why Choose Injectable Therapies?

Explore innovative therapies to reduce pain, improve mobility, and enhance your quality of life:

- Target pain directly inside the joint
- Reduce inflammation and improve function
- Minimally invasive, outpatient procedures
- Complementary to physical therapy and medications

Important Notes

- Viscosupplementation and Arthrosamid® is private pay or may be covered by 3rd party insurance. Please check with your provider.
- Joint & Steroid Injections are covered by OHIP
- Please speak with your NeuPath Centre for Pain & Spine Physician to see if treatments may work for you!

Treatments We Offer

Joint & Steroid Injections

- Corticosteroids injected into the joint to reduce inflammation and provide fast pain relief
- Often used for osteoarthritis, bursitis, and other joint inflammations.
- Pain relief can last from weeks to months depending on the condition

Procedure:

- Performed under sterile conditions with image guidance if needed.
- Quick outpatient procedure with minimal downtime

Viscosupplementation

- Injection of hyaluronic acid into the joint to improve lubrication and cushioning
- Helps restore the natural joint fluid that breaks down in osteoarthritis
- Typically used for knee osteoarthritis
- May reduce pain and improve joint function. Pain relief can last several months.

Procedure:

- Performed under sterile conditions with image guidance if needed
- Quick outpatient procedure with minimal downtime

Arthrosamid ®

- The first and only synovial scaffold designed to provide long-lasting pain relief for knee osteoarthritis

Procedure:

- Administered as a single injection, proven safe and effective for up to 2-5 years post-treatment
- Performed with image guidance

Clinical Highlights:

- No serious adverse events or allergic reactions reported
- Provides a supportive matrix inside the joint to protect cartilage and reduce pain
- Suitable for patients seeking an alternative to surgery or who have insufficient response to other treatments
